

“We cannot solve problems with the same thinking we used when we created them.”

Albert Einstein (1879-1955)

Agile project management is the proven tool that drives innovation and accountability within an organization to new heights of sustainable productivity.

EnAgile - 8 steps define your success

Challenges of Agile adoption:

Getting agile is not just renaming roles and introducing new meetings – a real transformation needs to be steered actively and tailored to your environmental requirements.

Are you experiencing the following:

- Cultural mindset is blocking the transformation
- Promised benefits of agility can not be leveraged
- Compliance to legal regulations are conflicting with agility
- Available agile frameworks don't fit your development environment

EnAgile is your accelerator to the Agile transformation:

EnAgile is a method that supports you developing your unique approach to Agility by facilitating the Agile practice development and adoption approach to improve organization, team and individual capabilities:

- Regular reports on Agile framework maturity with the current level of agility, environmental conditions and risks on 3-levels affected of transformation
- Evaluation and qualification of teams and individuals using the Agile potential Analysis and stakeholder analysis to address the people side of change
- Agile Framework and Entity relationship modeling that is customized based on your organization's transformation goals and desired agile approach

Your benefit by the numbers:

- Higher rates of Agile change acceptance (52%*)
- Training plan for Executives and experts (40%*)
- Cohesive entity relationship and processes (36%*)
- Frequent product delivery to ensure ROI (32%*)

* = percentage representing the failure factors according State of Agile report
