

(Senior) Consultant (all genders)

Safety Management

Department Safety Management
Experience Professionals
Site(s) Barcelona

Possible roles & tasks

- Work with our customers on safety concepts for modern driving functions, meeting functional safety requirements (e.g., in the automotive sector)
- Design and test current and future autonomous driving assistance systems deployed on the road worldwide and contribute to making them safe and robust
- Define and evaluate our client's current Safety processes
- Consult the client regarding upcoming Safety assessments
- Facilitate workshops on process optimization as well as the preparation of safety analyses at vehicle and component level (e.g. FMEA or FTA)

Profile

- You have successfully completed a degree in industrial engineering, electrical engineering, software engineering, information and communications technology or similar courses of study
- You already gained experience (> 3 years) as a Safety Manager
- You are enthusiastic about the development of technologies, open-minded and willing to quickly familiarize yourself with new topics
- Initial experience in the lateral management of smaller teams is a plus
- You already have knowledge of vehicle development and ISO standards (e.g., ISO 26262, IEC 61508)
- You are fluent in English, German skills are a plus
- You are willing to travel
